

SOURCE CODE OF THE EXAMPLE SHOWN IN THE VIDEO

[Example on JS Bin](#)

Source code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <title>Example of using readAsDataURL</title>
</head>
<body>
<input type="file" multipleonchange="readImagesAndPreview(this.files);">
<p>
<div id="thumbnails"></div>
11. <script>
    var container =document.getElementById("thumbnails");
    function readImagesAndPreview(files) {
      for(var i=0; i < files.length; i++){
        var f = files[i];
        var reader = new FileReader();
        reader.onload = function(e) {
21.         var img =document.createElement("img");
            img.src = e.target.result;
            img.width = 100;
            container.appendChild(img);
        }
        reader.readAsDataURL(f);
      }
    }
  </script>
</body>
```

</html>
