

Philippe Le Hégarret heads the [W3C Interaction Domain](#) where he oversees the development of technologies that shape the Web's user interface, including HTML5, CSS3, SVG, WOFF, and Web APIs. In addition to his focus on developing W3C's Open Web Platform standards, he oversees standards work in Web Performance, Internationalization, and Video on the Web.

In the video below, Philippe tells the story on how HTML5 has been developed by the Web community.
