

Grading policy

PASSING

This course is graded as pass/fail, meaning you will either be given a passing score or a failing score.

The score required to pass this course is 70%.

YOU WILL BE GRADED ON...

1. Week exercises

At the end of each week, you will find a small handful of questions, named after "Exercises - Week x" (where x is the week number). These are designed to assess your progress in the course, week after week. Questions will be in the form of multiple choice and checkboxes.

Week exercises will count towards 75% of the grade.

2. Final exam

The final exam will become available at the release of Week 6 on 10 November 2015. The final exam will consist of questions (multiple choice and checkboxes) covering the entirety of the course.

The final exam will count towards 25% of the grade.

YOU **WILL NOT** BE GRADED ON ...

- In the "About the Web and W3C" section, released on 30 September 2015, we provided 2 simple quizzes. They will not count in the final grade.
- You will find questions at the end of some pages. Each of these is called "knowledge check", and as the name indicates it, they are designed to test your retention of the knowledge, page after page.

- At the end of Week 4, you will be asked to create a Web "monster", using HTML5 drawing and animation techniques that will be taught in Weeks 3 and 4. This is an optional exercise, meaning that it won't be graded.
